SUBSTITUTING EGG WHITES FOR WHOLE EGGS

In most egg-based recipes, you can substitute 1 or 2 egg whites for a whole egg. If a recipe calls for 2 eggs, you can replace the 2 whole eggs by 1 whole egg and 2 egg whites, for example in meat loaf, hamburgers, pancakes, quick breads, muffins or salad dressing. Where a recipe calls for 2 egg yolks, use 1 whole egg instead, if you wish. For scrambled eggs, you can use 1 whole egg and any number of whites.

EGG SUBSTITUTE RECIPE

This natural egg substitute can be used to replace 2 or 3 eggs in most recipes.

3 egg whites
1/4 cup skim milk
1 tbsp. skim milk powder
1 tsp. vegetable oil
A pinch turmeric

Beat egg whites lightly with a fork. Stir in milk, milk powder, oil and turmeric, beating until well blended.

Makes about 6 tbsp./90 mL.

Helpful Hints

- You won't need sugar with your tea if you drink jasmine tea or any of the lighter-bodied varieties, like Formosa Oolong, which have their own natural sweetness. They are fine for sugarless iced tea, too.
- Calorie-free club soda adds sparkle to iced fruit juices, makes them go further and reduces calories per portion.
- For tea flavoring, dissolve old-fashioned lemon drops or hard mint candy in your tea. They melt quickly and keep the tea brisk!
- Most diets call for 8 ounces of milk and 4 ounces of fruit juice. Check your glassware. Having the exact size glass ensures the correct serving amount.
- Make your own spiced tea or cider. Place orange peels, whole cloves, and cinnamon sticks in a 6-inch square piece of cheese-cloth. Gather the corners and tie with a string. Steep in hot cider or tea for 10 minutes or longer if you want a stronger flavor.
- Always chill juices or sodas before adding to beverage recipes. To cool your punch, float an ice ring made from the punch rather than using ice cubes. Not only is this more decorative, but it also inhibits melting and diluting.
- Place fresh or dried mint in the bottom of a cup of hot chocolate for a cool and refreshing taste.
- One lemon yields about 1/4 cup juice; one orange yields about 1/3 cup juice. This is helpful in making fresh orange juice or lemonade!
- Never boil coffee; it brings out the acid and causes a bitter taste. Store ground coffee in the refrigerator or freezer to keep it fresh.
- Always use COLD water for electric drip coffee makers. Use 1 to 2 tablespoons ground coffee for each cup of water.
• Seeds and nuts, both shelled and unshelled, keep best and longest when stored in the freezer. Unshelled nuts crack more easily when frozen. Nuts and seeds can be used directly from the freezer.

• Cheeses should be served at room temperature, approximately 70°.

• Fresh lemon juice will remove onion scent from hands.

• To save money, pour all leftover vegetables and water in which they are cooked into a freezer container. When full, add tomato juice and seasoning to create a “free” soup.

• Three large stalks of celery, chopped and added to about two cups of beans (navy, brown, pinto, etc.), will make them easier to digest.

• When cooking vegetables that grow above ground, the rule of thumb is to boil them without a cover.

• A lump of sugar added to water when cooking greens helps vegetables retain their fresh color.

• Never soak vegetables after slicing; they will lose much of their nutritional value.

• Fresh vegetables require little seasoning or cooking. If the vegetable is old, dress it up with sauces or seasoning.

• To quickly bake potatoes, place them in boiling water for 10 to 15 minutes. Pierce their skins with a fork and bake in a preheated oven.

• To cut down on odors when cooking cabbage, cauliflower, etc..., add a little vinegar to the cooking water.

• To avoid tears when cutting onions, try cutting them under cold running water or briefly placing them in the freezer before cutting.

• A little vinegar or lemon juice added to potatoes before draining will make them extra white when mashed.

• To avoid toughened beans or corn, add salt midway through cooking.
• For an easy no-mess side dish, try grilling your vegetables along with your meat.

• To dress up buttered, cooked vegetables sprinkle them with toasted sesame seeds, toasted chopped nuts, and canned french-fried onions or slightly crushed seasoned croutons.

• When preparing a casserole, make an additional batch to freeze. It makes a great emergency meal when unexpected guests arrive. Just take the casserole from the freezer and bake it in the oven.

• To keep hot oil from splattering, sprinkle a little salt or flour in the pan before frying.

• Never overcook foods that are to be frozen. Foods will finish cooking when reheated. Don't refreeze cooked thawed foods.

• A few drops of lemon juice added to simmering rice will keep the grains separated.

• Green pepper may change the flavor of frozen casseroles. Clove, garlic and pepper flavors get stronger when they are frozen, while sage, onion and salt get milder.

• Don't freeze cooked egg whites; they become tough. Spray your grill with vegetable oil to prevent sticking. Instant potatoes are a good stew thickener.

• When freezing foods, label each container with its contents and the date it was put into the freezer. Store at 0°. Always use frozen cooked foods within one to two months.

• Store dried pasta, rice (except brown rice) and whole grains in tightly covered containers in a cool, dry place. Always refrigerate brown rice, and refrigerate or freeze grains if they will not be used within five months.
• Glazed pottery, earthenware, glass, metal - all can be used for casseroles. Many of these casserole containers come in bright colors and pleasing designs to complement your tableware. The type of container you use makes very little difference, as long as it is heat-proof.

• Soufflé dishes are designed with straight sides to help your soufflé climb to magnificent heights. Ramekins are good for serving individual casseroles.

• To keep boiled lasagna noodles from sticking together as they cool, keep the noodles separate by draping them over the rim of a pot.

• Use little oil when preparing sauces and marinades for red meats. Fat from the meat will render out during cooking and will provide plenty of flavor. Certain meats, like ribs, pot roast, sausage and others, can be parboiled before grilling to reduce the fat content.

• When shopping for red meats, buy the leanest cuts you can find. Fat will show up as an opaque white coating, or can also run through the meat fibers, as marbling. Although most of the fat (the white coating) can be trimmed away, there isn’t much that can be done about the marbling. Stay away from well marbled cuts of meat.

• Home from work late with no time for marinating meat? Pound meat lightly with a mallet or rolling pin, pierce with a fork, sprinkle lightly with meat tenderizer and add marinade. Refrigerate for about 20 minutes and you’ll have succulent, tender meat.

• Marinating is a cinch if you use a plastic bag. The meat stays in the marinade and it’s easy to turn and rearrange. Cleanup is easy; just toss the bag.

• It’s easier to thinly slice meat if it’s partially frozen.

• Tomatoes added to roasts will help to naturally tenderize them. Tomatoes contain an acid that works well to break down meats.

• Whenever possible, cut meats across the grain; they will be easier to eat and have a better appearance.
• When frying meat, sprinkle paprika over it to turn it golden brown. Thaw all meats in the refrigerator for maximum safety.

• Refrigerate poultry promptly after purchasing. Keep it in the coldest section of your refrigerator for up to two days. Freeze poultry for longer storage. Never leave poultry at room temperature for more than two hours.

• If you're micro-waving skinned chicken, cover the baking dish with vented clear plastic wrap to keep the chicken moist.

• Lemon juice rubbed on fish before cooking will enhance the flavor and help maintain a good color.

• Scaling a fish is easier if vinegar is rubbed on the scales first.

• Push animal shaped cookie cutters lightly into icing on cakes or cupcakes. Fill depressed outlines with chocolate icing or decorating confections.

• Fill flat bottomed ice cream cones half full with cake batter and bake. Top with icing and decorating confections.

• Marshmallows can be used for candle holders on cakes.

• To keep the cake plate clean while frosting, slide 6-inch strips of waxed paper under each side of the cake. Once the cake is frosted and the frosting is set, pull the strips away leaving a clean plate.

• When decorating a cake with chocolate, you can make a quick decorating tube. Put chocolate in a heat-safe zipper-lock plastic bag. Immerse in simmering water until the chocolate is melted. Snip off the tip of one corner, and you can squeeze the chocolate out of the bag.

• Professionally decorated cakes have a silky, molten look. To get that appearance, frost your cake as usual, then use a hair dryer to blow-dry the surface. The slight melting of the frosting will give it that lustrous appearance.
• To ensure that you have equal amounts of batter in each pan when making a layered cake, use a kitchen scale to measure the weight.

• To make cookie crumbs for your recipes, put cookies into a plastic bag and run a rolling pin back and forth until they are the right size.

• To decorate cookies with chocolate, place cookies on a rack over waxed paper. Dip the tines of a fork with chocolate, and wave the fork gently back and forth making wavy lines.

• A gadget that works well for decorating sugar cookies is an empty plastic thread spool. Simply press the spool into the dough, imprinting a pretty flower design.

• Some holiday cookies require an indent on top to fill with jam or chocolate. Use the rounded end of a honey dipper to make the indent.

• When a recipe calls for packed brown sugar, fill the correct size measuring cup with the sugar, and then use the next smaller size cup to pack the brown sugar into its cup.

• To refinish antiques or revitalize wood, use equal parts of linseed oil, white vinegar and turpentine. Rub into the furniture or wood with a soft cloth and lots of elbow grease.

• To stop the ants in your pantry, seal off cracks where they are entering with putty or petroleum jelly. Also, try sprinkling red pepper on floors and counter tops.

• To fix sticking sliding doors, windows and drawers, rub wax along their tracks.

• To make a simple polish for copper bottom cookware, mix equal parts of flour and salt with vinegar to create a paste. Store the paste in the refrigerator.

• Applying baking soda on a damp sponge will remove starch deposits from an iron. Make sure the iron is cold and unplugged.

• Remove stale odors in the wash by adding baking soda.
• To clean Teflon™, combine 1 cup water, 2 tablespoons baking soda and \(\frac{1}{2}\) cup liquid bleach. Boil in stained pan for 5 to 10 minutes or until the stain disappears. Wash, rinse, dry and condition with oil before using the pan again.

• Corning Ware can be cleaned by filling it with water and dropping in two denture cleaning tablets. Let stand for 30 to 45 minutes.

• A little instant coffee will work wonders on your wood furniture. Just make a thick paste from instant coffee and a little water, and rub it into the nicks and scratches on your dark wood furniture. You'll be amazed at how new and beautiful those pieces will look.

• For a clogged shower head, boil it for 15 minutes in a mixture of \(\frac{1}{2}\) cup vinegar and 1 quart water.

• For a spicy aroma, toss dried orange or lemon rinds into the fireplace.

• Tin coffee cans make excellent freezer containers for cookies. Add raw rice to the salt shaker to keep the salt free-flowing. Ice cubes will help sharpen garbage disposal blades.
Beef Fact Sheet

Marinating Tips

- Less tender cuts of beef should be marinated to enhance tenderness. The cuts include: top round steak, eye round steak, chuck shoulder steak, skirt steak and flank steak. Tender cuts of beef can be marinated for flavor.

- Marinate in the refrigerator, NEVER at room temperature.

- Marinate in a food-safe plastic bag or glass utility dish.

- Turn meat occasionally during marinating so that all sides are equally exposed to marinade.

- Allow 1/4 to 1/2 cup marinade for each 1 to 2 lbs. of beef.

- If a marinade is to be used later for basting or served as a sauce, reserve a portion of it before adding the beef.

- Marinade that has been in contact with uncooked meat must be brought to a full rolling boil before it can be used as a sauce.

- For Flavor Only, Marinate for 15 minutes to 2 hours. For Tenderizing, Marinate for at least 6 hours. Marinating longer than 24 hours can result in a mushy surface texture.

Preparation Tips

- Leave a thin layer of fat on steaks and roasts during cooking to preserve juiciness. Trim fat after cooking.

- Pat beef steaks, cubes and pot roasts dry with paper toweling for better browning.

- To make cutting strips for stir-frying easier, partially freeze beef to firm.
• Use a gentle touch with ground beef. Over mixing or compacting will result in firm dense burgers, meatballs or meatloaves when cooked.

• Salt beef after cooking or browning. Salt draws out moisture and inhibits browning.

• For tender cuts, dry heat methods such as broiling, roasting, pan-broiling, sautéing/pan-frying, and grilling are best. Moist heat methods, such as braising and cooking in liquid, are better choices for less tender cuts.

• High heat can overcook or char the outside of beef cuts while the inside remains underdone. For tender beef, cooked to the desired doneness, use medium heat with dry cookery methods and low heat for moist cookery methods.

• Turn steaks and roasts with tongs. Do not use a fork, which pierces the beef and allows flavorful juices to escape.

• Turn ground beef patties with a spatula. Do not flatten them, causing flavorful juices to escape and resulting in a dry burger.

Preparation Methods

Pan-Broiling Beef

• Heat heavy nonstick skillet 5 minutes over medium heat.

• Season beef (straight from refrigerator), as desired. Place beef in preheated skillet (do not overcrowd). Do not add oil or water. Do not cover.
• Pan broil according to chart, turning once. (For cuts 4 inch thick, turn occasionally) Remove excess drippings from skillet as they accumulate. After cooking, season beef with salt, if desired.

Pan-Frying Beef

This cooking method is best for thin, tender beef cuts. Lean cuts, such as cubed steaks or floured and breaded cuts, may require additional oil to prevent sticking.

• Heat small amount of oil in heavy nonstick skillet over medium heat until hot.

• Season beef (straight from refrigerator), as desired. Place beef in preheated skillet (do not overcrowd). Do not add water. Do not cover.

• Pan-fry to desired doneness, turning occasionally. After cooking, season beef with salt, if desired.

Broiling Beef

• Set oven regulator for broiling; preheat for 40 minutes. During broiling, the oven door for electric ranges should be left ajar; the oven door for gas ranges should remain closed. (However, consult your owner's manual for specific broiling guidelines.)

• Place beef (straight from refrigerator) on rack of broiler pan. Season beef, as desired. Position broiler pan so that surface of beef is within specified distance from the heat as indicated in chart.

• Broil according to chart, turning once. After cooking, season beef with salt, if desired.

Stir-Frying Beef

Cook beef and vegetables separately, then combine and heat through. The cooking liquid may be thickened with cornstarch dissolved in water, if desired.
- Partially freeze beef for easier slicing. Cut into thin, uniform strips or pieces. Marinate to add flavor or tenderize while preparing other ingredients, if desired.

- Heat small amount of oil in wok or large heavy nonstick skillet over medium-high heat until hot.

- Stir-fry beef in half-pound batches (do not overcook), continuously turning with a scooping motion, until outside surface of beef is no longer pink. Add additional oil for each batch, if necessary.

**Roasting Beef**

- Heat oven to temperature specified in chart.

- Place roast (straight from refrigerator), fat side up, on rack in shallow roasting pan. Season roast, as desired. Insert ovenproof meat thermometer so tip is centered in thickest part of roast, not resting in fat or touching bone. Do not add water. Do not cover.

- Roast according to chart. Transfer roast to carving board; tent loosely with aluminum foil. Let roast stand 15 minutes. (Temperature will continue to rise 5 to 10°F to reach desired doneness and roast will be easier to carve.)

**Grilling Beef**

- Prepare charcoal for grilling. When coals are medium, ash-colored (approximately 30 minutes), spread in single layer and check cooking temperature. Position cooking grid. (To check temperature, cautiously hold the palm of your hand above the coals at cooking height. Count the number of seconds you can hold your hand in that position before the heat forces you to pull it away; approximately 4 seconds for medium heat.)

- Season beef (straight from refrigerator), as desired. Place on cooking grid directly over coals.
• Grill according to chart, turning occasionally. After cooking, season beef with salt, if desired. (Because gas grill brands vary greatly, consult your owner's manual for grilling guidelines.)

Cooking Beef In Liquid

The cooking liquid may be reduced or thickened for a sauce, as desired.

• Coat beef lightly with seasoned flour, if desired. Slowly brown on all sides in small amount of oil in heating pan. Pour off drippings. Omit browning step for corned beef brisket.

• Cover beef with liquid (e.g. broth, water, juice, beer or wine). Add seasoning, as desired. Bring liquid to boil; reduce heat to low.

• Cover tightly and simmer gently over low heat on top of the range according to chart or until beef is fork-tender.

Braising Beef

The cooking liquid may be reduced or thickened for a sauce, as desired.

• Slowly brown beef on all sides in small amount of oil in heavy pan. Pour off drippings. Season beef, as desired.

• Add small amount (1/2 to 2 cups) of liquid (e.g. broth, water, juice, beer or wine).

• Cover tightly and simmer gently over low heat on top of the range or in a 325°F oven according to chart or until beef is fork-tender.

Storage Tips

• When shopping, select beef just before checking out. If it will take longer than 30 minutes to get home, keep it cold in a cooler until you can refrigerate it.

• Immediately freeze any beef you don't plan to use within a few days and store it at 0°F or colder. Label each package with the date, name of beef cut and weight or number of servings.
• Beef can be frozen in its original transparent packaging for up to two weeks. For longer storage, prevent freezer burn by rewrapping the beef in moisture-proof airtight material such as freezer paper, food-safe plastic freezer bags or heavy-duty aluminum foil. Squeeze out as much air as possible before sealing.

• Refrigerate leftovers promptly after serving (within two hours after cooking). Divide large quantities of food into smaller portions or spread out in a shallow container to chill more quickly.

Safety Tips

• For food safety reasons, USDA/FSIS recommends cooking beef steaks to a minimum internal temperature of 145°F (medium rare) and ground beef patties to 160°F (medium).

• The most accurate way to determine doneness is to use an instant-read thermometer. Horizontally insert the thermometer into the steak or burger near the end of cooking time and check the temperature. An instant-read thermometer is not heatproof so it cannot be left in while cooking, but once inserted, the temperature registers in seconds.

• Wash hands thoroughly in hot soapy water before and after handling meat and other fresh foods. Wash all utensils, cutting surfaces and counters with hot soapy water after contact with raw meat.

• Keep raw meat and meat juices from coming into contact with other foods during preparation. Keep carving boards separate from other cutting boards.

• Keep in mind that ground meats are more perishable than roasts or steaks. During grinding, any bacteria that are on the surface are mixed throughout the meat, resulting in shorter shelf life.

And also that every man should eat and drink, and enjoy the good of all his labour, it is the gift of God.
